

Productos de calidad. Excelencia en el servicio.

Vertical Cable Manager with Door for H1 Server Cabinets *H1VFM Serie*

Vertical finger cable manager with door designed for structured cable routing inside server cabinets.

Key Features and Benefits

- 16-gauge steel body provides durable vertical cable routing and support within server cabinet environments.
- Fingers and door clips are molded from UL94-V0 rated polycarbonate, supporting cable protection and enhanced safety.
- Removable aluminum cover provides cable containment and a clean, professional installation.
- Designed to mount vertically to cabinet rails, enabling structured cable routing within enclosed rack systems.
- Finger-style duct organizes cables at each rack unit for improved accessibility and cable separation.
- Available in multiple widths to support varying cable density requirements.
- Optimized for use with Hammond **H1 server cabinets** for a fully integrated cable management solution.
- Supports routing of fiber, Cat6/6A, and coax cables in high-density cabinet environments.
- Includes mounting hardware for quick installation.
- TAA-compliant, manufactured in North America supports government procurement requirements and ensures consistent quality.
- Black powder coat finish (GREENGUARD, TSCA, RoHS compliant) supports indoor air quality and environmental compliance.

The H1VFM Series vertical cable managers provide a structured solution for routing and organizing cables within server cabinets. Designed specifically for Hammond H1 cabinets, they integrate directly into the rack to support high-density cable management while maintaining accessibility and airflow.

With steel construction, UL94-V0 rated polycarbonate fingers, and a removable aluminum cover, the H1VFM Series delivers durable, organized cable routing for modern data center and network environments.

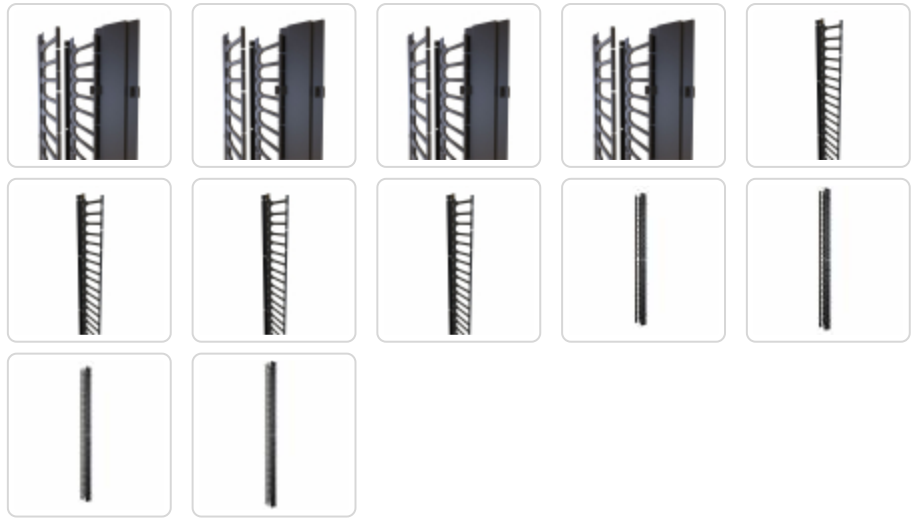

Where the H1VFM Series Works Best

- Server cabinets in data centers
- Network and telecom installations
- High-density IT environments
- Enterprise infrastructure deployments
- Cabinet-based rack systems

Best Applications for the H1VFM Series

- Managing vertical cable runs inside server cabinets
- Organizing high-density patching environments
- Supporting structured cable routing in enclosed racks
- Improving airflow and serviceability within cabinets
- Maintaining clean and professional cabinet installations
