## Vertical Cable Manager for Wall Mount Racks *WRCM Serie*

Vertical cable manager designed specifically for wall mount racks to support organized cable routing in space-constrained installations.

### Key Features and Benefits

- 16-gauge steel construction provides durable vertical cable routing and support for wall-mounted IT, AV, and network installations.
- Fingers and cover clips are molded from UL94-V0 rated flame-retardant polycarbonate, supporting enhanced safety and long-term durability.
- Designed specifically for wall mount racks to provide vertical cable management where traditional floor rack solutions are not feasible.
  - Compatible with **RB-2PW** and **HWMR**.
- Provides structured cable routing to reduce clutter and improve organization in space-constrained environments.
- Helps reduce strain on connectors and supports proper cable routing near wall-mounted equipment.
- Compact design fits alongside wall racks without interfering with installation or access.
- Supports routing of fiber, Cat6/6A, and coax cables in low-profile installations.
- Improves serviceability by organizing cables for easier identification and maintenance.
- Ideal for telecom rooms, network closets, and edge deployments.
- Compatible with Hammond wall racks and many third-party wall-mounted rack systems.
- TAA-compliant, manufactured in North America supports government procurement requirements and ensures consistent quality.
- Black powder coat finish (GREENGUARD, TSCA, RoHS compliant) supports indoor air quality and environmental compliance.

The WRCM Series vertical cable managers provide a purpose-built solution for managing cables in wall-mounted rack installations. Designed for environments where space is limited, they enable structured vertical cable routing without requiring a full floor-mounted rack system.

Unlike traditional vertical cable managers designed for open frame racks, the WRCM Series is optimized for wall-mounted applications, helping reduce cable clutter, improve organization, and support reliable system performance in edge and network environments.

### Where the WRCM Series Works Best

- Network closets and telecom rooms
- Wall-mounted IT and AV installations
- Edge deployments and distributed networks
- Retail, healthcare, and education environments
- Small to mid-size network infrastructure

### Best Applications for the WRCM Series

- Managing cables alongside wall-mounted racks
- Organizing vertical cable runs in confined spaces
- Supporting clean cable routing in edge installations
- Reducing cable strain in wall-mounted environments
- Improving accessibility and maintenance in small installations
