Gasket replacing/cleaning procedure

1. Wipe down enclosure. Ensure enclosure is completely dry prior to removing cover.
2. Loosen screws.
3. Remove cover.
4. Wipe off remaining water droplets.
5. Remove gasket.
6. Clean and dry gasket and cover.
7. Place gasket firmly into cover around retainer.
8. Align cover to enclosure.
9. Tighten 10-32 screws by hand.
10. Ensure gasket is properly sealed and sitting flush on enclosure.
11. Torque 10-32 screws to 15 in/lbs.
